

Response LSK

POLYESTER/NYLON LOW STRETCH KERNMANTLE BRAID

Response LSK is a low stretch kernmantle rope engineered for rope access, rescue, and work-at-height applications. Manufactured from high-quality polyester and nylon fibres, it delivers reliable performance, durability, and controlled elongation, while meeting applicable CE requirements. This rope must always be used in conjunction with approved personal protective equipment and relevant safety systems.

FEATURES:

- Low stretch kernmantle construction
- Polyester sheath with nylon core
- Abrasion resistant
- Type A rope classification
- Smooth or rough cover construction options
- Sewn eye termination option
- Reflective marker strand option
- Custom colour options

APPLICATIONS:

- Rope access
- Work positioning
- Fall restraint
- Static descent
- Abseiling
- Belay systems
- Rescue operations
- Safety lines
- Access lines
- Speleology

TECHNICAL:

Cover: HT Polyester
Core: Nylon
Construction: Double Braid Kernmantle

STANDARD RANGE:

Diameters: 13 mm
Reel Length: 200 m
Colour: Solid Colours / White with Colour Marker

Diameter (mm)	Weight	Static Strength (Linear)	Static Strength (Knotted)
13 mm	129 g/m	40.13 kN	31.54 kN
