

Super-X Chafe Guard

Southern Ropes' Super-X Chafe Guard is a high-performance protective cover engineered to provide exceptional resistance against cutting, abrasion, and wear, helping to extend the service life of ropes in demanding applications. Manufactured from High Modulus Polyethylene (HMPE), this lightweight, floating, braided tubular sleeve delivers full rope protection while maintaining excellent durability and flexibility. The HMPE construction offers outstanding cut resistance, does not absorb water, and can be seamlessly splice-terminated into Southern Ropes braided rope constructions for a secure and integrated solution.

FEATURES:

- Superior wet and dry protection
- Lightweight
- Flexible
- Cut Resistant
- Low coefficient of friction
- UV Resistant
- Easy to handle

APPLICATIONS:

- Mooring Lines
- Lifting Slings
- Winch Lines
- Soft Shackles
- Outdoor Applications

TECHNICAL:

- Material: HMPE
- Length: Dependent on Application

OPTIONS:

- Custom Colours
- Custom Lengths
