Stealth Fibre® Shockcord

High stretch elastomer covered with HMPE braid. This cord is primarily designed for securing objects that need stretch. The cover is made from the Southern Ropes Stealth Fibre® which makes the cover harder wearing and stronger. The Stealth Shock Cord will not absorb water.

FEATURES

- 100% Stretch
- Excellent recovery from stretch
- Soft in hand
- High tenacity and abrasion resistance
- Will not fade in UV
- High resistance to UV

APPLICATION

- Securing
- Take up Lines
- Nets

Break-loads are higher than shock cord with Polyester covers, however, its the highest abrasive cover that makes it more attractive.

TECHNICAL

- Cover: Stealth Fibre®
- Core: Rubber
- Construction: Braid over parallel core

STANDARD RANGE

- 4mm
- 5mm
- 6mm
- 100m Reels
