

Super-T Braid

SUPER-12® WITH TECHNORA®/HT POLYESTER COMPOSITE COVER

This high-performance sailing braid is designed for ultra-low stretch applications requiring good heat management. The compact construction of the core provides rigidity in clutches and jammer, while the Technora® in the cover increases tensile strength as well as abrasion resistance. The high UV rating of the Stealth Fibre® core means that the cover can be stripped without fear of a UV-related loss in strength.

FEATURES:

- Great heat management
- Good grip around blocks and in cleats
- Light weight
- UV resistant core
- Ultra-low stretch
- Low creep

APPLICATIONS:

- Sheets
- Halyards
- Control Lines
- Out/downhauls
- Guys
- Runner Tails
- Kickers
- Reefing Lines
- Furlers
- Travellers

TECHNICAL:

- Cover: Aramid
- Core: Stealth Fibre®
- Construction: Braid-on-Braid
- Reel: 200m
- Diameter: 11mm (Gold)

RANGE:

- 4 - 30 mm (larger diameters available on request)
- 200m Reel
- Available in mottle colours with black or beige Technora® (custom colours available on request)

Diameter (mm)	Spliced Break Load (t)	Linear Break Load (t)	Kg/100m
4	0.28	0.31	1.19
5	0.85	0.94	1.86
6	1.30	1.40	2.68
7	2.20	2.40	3.64
8	3.10	3.40	4.76
9	4.30	4.70	6.03
10	5.20	5.70	7.44
12	8.30	9.20	10.72
14	10.90	12.00	14.59
16	15.30	16.90	19.06
18	17.90	19.80	24.13
20	27.00	29.90	29.79
22	31.30	34.70	36.04
24	40.80	45.20	42.89
26	47.00	52.10	50.34
28	55.20	61.20	58.38
